Content Sync User Guide

Content Sync Module

Shore side application whose main function is to sync text and image content for the Shorex masters currently being authored in Adobe Experience Manager shore side for ingestion by the Kiosk Control Centre on the ship.

All content displayed by the kiosk will be as authored within AEM. The system shall carry out authenticity checks of all content data extracted to avoid the possibility of bogus content being displayed at the kiosks, possibly with malicious intent. The shore excursions content (text, images) displayed by the kiosk service shall be sourced unchanged, which is extracted from the AEM Sync.

Table of Contents
